### **DETAILED ACTION**

1. This office action is in response to amendment A, filed on August 8, 2003. Claims 1-31 are considered for examination.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, and 19-31 are drawn to Priority Scheduling, classified in class 718, and subclass 103.
- II. Claims 14-18 drawn to Task Management and Control, classified in class 718, subclass 100.

Inventions I, and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has the utility such as means or steps for scheduling multiple tasks based upon a considered factor such as priority of execution. Invention II is related to means or steps for administrating over processor or job execution in a digital data processing system. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2127

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

2. A shortened statutory period for reply to this office action is set to expire ONE MONTH or THIRTY DAYS; whichever is longer, from the date of this Office Action.
